1. The disclosure is objected to because of the following informalities:

In line 5 of claim 1, --on-- should be inserted after "support arm". Appropriate correction is required.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation "upper and lower opposed guide plates which provide for relative rotational movement there between to simultaneously effect pivotal movement...while effecting rotational movement...", found in lines 5-8 of claim 1, is unclear with respect to how the guide plates "provide for" relative rotation and is also unclear with respect to how the guide plates effect the simultaneous pivotal and rotational movements.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Beavers.

Beavers discloses a spare tire carrier including support arm 21 and tubular assembly 21, 22, 23, 24, 26.
